Press Kit Formatting Note

Given the transitory nature of the series as it progresses through the seasons, so too shall be this press kit. Season-specific information will be added as we make our way through the series.

For that reason there are no set pages for the table of contents. As we progress through the marathon this kit will expand, increasing the number of pages and throwing any counting scheme off.

Battlestar Galactica

The Cylons were created by a race of reptiles.

Cylons and humanity had waged a terrible war between one another for nearly a millennia. Hope, at long last, seemed to shine bright on the horizon as the peace accords for the armistice assembled to end the horrific and devastating conflict once and for all. Then the attack came. With the human colonies wiped out the survivors, banded together in a rag-tag fleet, now search for that one final human refuge: the mythical thirteenth colony known as Earth.

Debuting in 1978, *Battlestar Galactica* was a remarkable television series for its time. Banking on the post-*Star Wars* hype the show, as conceived by Glen Larsen, dealt with the heavy themes of a post-apocalyptic world where the human race is all but wiped out by a superior enemy bent on finishing the job. This is a startling contrast to its sci-fi television forebears, the majority of which attempted to keep an optimistic atmosphere even in the face of overwhelming odds. *Star Trek* offered a tidy and Technicolor universe, *Lost in Space* kept on smiling even when Earth and home seemed the most distant. *Galactica's* end-times storyline was quite novel for its time and place on prime-time network television.

Unfortunately, NBC didn't see fit to agree entirely with this ideology and began inflicting their sway to push the show into a more family-friendly hour. This led to a growing campiness very early on in the series which did more to hurt the show's popularity than promote it to a larger audience. Still, the show was a decent success prompting surprise amongst the fans upon its cancellation after only a single season. The main reason for the series' premature ending was likely due to the exorbitant costs of its production – it was, after all, the most expensive show on television at the time. With its massive amount of special effects and large guest casts, *Galactica's* production budget failed to make it profitable. Fan protest succeeded in bringing the show back in a much reduced and sterilized form as *Galactica 1980* before that too was shelved after a run of only ten disappointing episodes.

Many attempted over the years to bring the show back, from Richard Hatch's (Captain Apollo) trailer *Battlestar Galactica: The Second Coming* in 1999 through the almost-to-production continuation series by Brian Singer and Tom Santos in 2001. Finally, in 2003, the Sci-Fi channel green-lighted Ronald D. Moore and David Eick to begin production on a miniseries for their proposed *Galactica* series.

This met with hostility from hardcore fans of the original series who disapproved of Moore and Eick's tampering with their universe. Nevertheless, the new *Battlestar Galactica* has gone on to produce four seasons of television and has opened an entire new generation up to the *Galactica* universe, to embrace both shows for their own unique merits.

Galactica Marathon

The emblem for the *Battlestar Galactica* Marathon features the standard Colonial Forces unit insignia design as seen on all Colonial uniforms in the new reimagined series. Where patches on that *Galactica*'s uniforms feature the ship's Battlestar Group number along the bottom – in *Galactica*'s case BSG-75 – this insignia instead emphasizes the marathon.

In the center are the triangular shapes from *Galactica*'s ship patch in the original series. The inclusion of the new *Galactica*'s insignia with the old show's emblem connects the two disparate eras of *Battlestar Galactica* and reminds us that, since the reimagined show's marathon is over, we now have the entire original show to watch.

Episode Guide

Season One : Battlestar Galactica.

		Original Airdate:
101	Saga of a Star World	September 17, 1978
102	Lost Planet of the Gods, Part I	September 24, 1978

Relevant Spacecraft

A brief guide to the Colonial, civilian, and Cylon spacecraft as seen in the show.

Season One : Battlestar Galactica.

COLONIAL FORCES

Battlestar Atlantia

President Adar's flagship, destroyed during the Battle of Cimitar.

Battlestar Galactica

Last remaining battlestar and leader of rag-tag fleet in search of the mythical planet Earth.

Battlestar Pegasus

Surviving battlestar commanded by Cain. Whereabouts after Battle of Gamoray remain unknown.

Colonial Viper

Colonial workhorse fighter craft, used for long-range patrols and in defense of the mothership.

THE FLEET

Rising Star

Luxury liner containing the finest comforts of all the vessels in the fleet.

Agro Ships

Vessels within fleet containing gardens capable of growing fruits and vegetables. Most destroyed.

Prison Barge

Prison ship carrying fugitives and other riff-raff back to Colonies for trial.

Celestra

Electronics ship and site of a mutiny against Commander Kronus.

ENEMY FORCES

Cylon Basestar

Double-saucer hulled Cylon mothership, each carrying thousands of raiders and troops.

Cylon Raider

Cylon fighter craft flown by three centurions, used for defense and raiding attacks.

Eastern Alliance Destroyer

Spacecraft operated by Eastern Alliance to instill fear and terror among its subjects.

Battlestar Galactica Marathon **Press Kit**

Season Two : Galactica 1980.

COLONIAL FORCES

Colonial Viper (variant)

Two-occupant variant of the standard Viper fighter craft.

Colonial Turbine

A single-occupant flight-capable motorcycle used principally for ground transport.

THE FLEET

Anti-gravity Ship

Prototype vessel built under Dr. Zee's guidance. Shaped like a flying saucer.

Delphi

Freighter serving as the fleet's school ship.

Hybrid craft

Half-Colonial, half-Cylon spacecraft constructed by Starbuck from wreckage of two ships.

ENEMY FORCES

A-B Raider

Large Cylon fighter craft flown by six centurions used for defense, raiding, and possible troop carrying.

Colonial Measurement

This is a list of Colonial units of measurement and their Earth counterparts.

Centar : Hour

Centon : Minute

Ergon : Radiation energy

Hectar : 9 million miles (1/10 parsec)

Kilon : Speed of spacecraft

Laxon : Unit of dry measurement

Maxim : 10 meters

Megon : Megaton

Metric : Kilometer

Metron : Meter

Microcenton : Meter

Micron : Split second, .6 seconds

Millicenton : About 10 minutes

Parsec : 90 million miles (10 hectares)

Quatron : About 1 month

Radion : Rad (radiation)

Sectar : Alternate of hectar

Secton : Week

Time cycle : Day

Volton : Voltage

Wavelon : Wavelength

Yahren : Year

Press Release

The official press release for the Battlestar Galactica Marathon:

• • •

Sunday, June 28, 2008.

The Cylons were *not* created by man.

They *still* rebelled.

They *didn't* evolve.

And they *did* have a plan.

With the reimagined series *Battlestar Galactica* marathon successfully completed it's time to return to its roots. The original series, that much discounted space opera, still deserves some respect. That said, this second chapter of the *Battlestar Galactica* marathon series aims to showcase the original 1978-79 series and its sorry sequel, *Galactica 1980*. Gone is all the nerve-wracking serious drama of the new show and in its place a long line of clunky centurions and questionable science from the era of that post *Star Wars* sci-fi high. By your command.

• • •

The Battlestar Galactica Marathon is to be held at Josh's House.
